

## Insulation and Sarking

R-value measures the ability of the insulation to resist heat flow or sound, where the higher the value, the greater the effectiveness of the insulation.

| Size (mm)                         | Length (mm)                  |
|-----------------------------------|------------------------------|
| <b>Thermal Insulation Batts</b>   |                              |
| <b>Glasswool</b>                  |                              |
| <b>Ceilings</b>                   |                              |
| R2.5 430 x 145                    | 1160                         |
| R3.0 430 x 150                    | 1160                         |
| R3.5 430 x 215                    | 1160                         |
| <b>Walls and Floors</b>           |                              |
| R1.5 430 x 75                     | 1160                         |
| R2.0 430 x 90                     | 1160                         |
| <b>Polyester</b>                  |                              |
| <b>Ceilings</b>                   |                              |
| R2.5 430 x 145                    | 1170                         |
| <b>Walls and Floors</b>           |                              |
| R1.5 430 x 75                     | 1170                         |
| <b>Sound Insulation Batts</b>     |                              |
| <b>High Density Rockwool</b>      |                              |
| <b>Ceilings</b>                   |                              |
| R3.0 430 x 115                    | 1350 **                      |
| R2.5 430 x 88                     | 1350                         |
| R2.0 430 x 75                     | 1350                         |
| <b>Walls and Floors</b>           |                              |
| R2.0 430 x 75                     | 1350                         |
| <b>Insulation Boards</b>          |                              |
| 1200 x 10                         | 2700                         |
| 1200 x 15                         | 2700                         |
| <b>Reflective Insulation foil</b> |                              |
| <b>Wall Breather</b>              |                              |
| 1350 mm wide                      | 20m and 60m rolls available. |
| <b>Wall Wrap</b>                  |                              |
| 1350 mm wide                      | 20m and 60m rolls available. |
| <b>Homewrap</b>                   |                              |
| 2743 mm wide                      | 30m roll                     |
| 3048 mm wide                      | 30m roll                     |
